## HEAVY DUTY TESTER 145kN

Tension for pull out tests on Heavy Duty Anchors and Chemical Anchors

### Tester Features

- Tester with fixed gauge calibrated to 145kN
- Weight 16Kg – Dimensions 46x36x29
- Compact and practical, it grants safety and reliability
- Load spreading bridge feet granting the proper positioning in every situation
- Digital readout
- Ratchet handle operation
- Lightweight aluminium triangular stand
- Load spreading bridge
- Maximum tensile load 145kN
- Low handle effort to achieve load
- Threaded adaptors available in sizes: M12, M16, M20, M24, M30
- Calibration Certificate
- Supplied in a Metal Carrying Case

# TENSION TESTER 145 kN

The new portable tension tester Vorpa:  
safety and in compliance with regulations

Testing capacity 145kn

Vorpa offers a Heavy Duty Tester for pull out, load and capacity tests. With a testing capacity of 145kN and a digital readout the Tester has been designed to meet the demand for proof load testing of larger construction fixings enabling the scaffolding contractors to undertake their own on site testing.

#### The Kit contains:

- Tester completed with Calibration Certificate
- Threaded adaptors available in sizes: M12, M16, M20, M24, M30
- Ratchet Spanner
- Carrying Case
